Professional Summary

Information Technology graduate with a strong foundation in Java, Python, Spring Boot, SQL, and web development. Knowledge of Object-Oriented Programming, Data Structures, DBMS, RESTful APIs, and database-driven applications. Hands-on experience developing full-stack applications, integrating Generative AI APIs, and building AI-powered automation tools. Seeking an entry-level Software Developer role to apply technical knowledge and contribute to real-world software solutions.

Technical Skills

Programming Languages: Java, Python, SQL, JavaScript
Web Technologies: HTML, CSS, Bootstrap, React, Flask
Frameworks & APIs: Spring Boot, Spring Data JPA, RESTful APIs
Databases: MySQL, SQLite
Core Concepts: OOP, DSA, DBMS, Cloud Fundamentals
Tools & Platforms: Git, GitHub, HackerRank, CodeChef
AI Technologies: Generative AI, Google Gemini API, Groq API

Education

Technocrats Institute of Technology, Bhopal 2026
B.Tech in Information Technology CGPA: 7.64/10

JD Public School, Chapra, Bihar 2022
Senior Secondary (Class XII) 72.6%

Holy Kids International School, Chapra, Bihar 2020
Secondary (Class X) 72.8%

Projects & Practical Experience

Food Retail Management System (Java, Spring Boot, MySQL) GitHub | Live

- Developed a web-based food retail management application using Java 21 and Spring Boot.
- Implemented product management and CRUD operations using Spring Data JPA and MySQL.
- Designed RESTful APIs to manage product information and support retail operations.

AI Quiz Generator (Python, Flask, Gemini API) GitHub | Live

- Built a Generative AI-based web application that creates topic-based multiple-choice quizzes.
- Integrated Google Gemini API to generate questions, answer options, and quiz content.
- Developed an interactive interface for attempting quizzes and viewing scores and results.

ABHINAV AI – Personal AI Voice Assistant (Python, Flask, Groq AI) GitHub | Live

- Developed an AI-powered personal voice assistant using Python, Flask, and Groq API for intelligent conversations.
- Implemented Windows laptop automation features including application control, website access, folder navigation, file search, and screenshot capture.
- Built an interactive dashboard with JavaScript voice recognition and text-to-speech responses; deployed the AI web application on Render.

AI Resume Builder (Python, Flask, SQLite, Gemini API) GitHub | Live

- Developed a resume builder application with user authentication, resume management, multiple templates, and PDF downloads.
- Integrated Google Gemini API to generate professional resume summaries and improve project descriptions.
- Implemented an ATS checker to calculate estimated resume scores and identify matched and missing keywords.

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)** – Knowledge of cloud concepts, Azure services, and cloud fundamentals.
- **ServiceNow System Administration** – Knowledge of platform administration and system workflows.

Achievements

- Solved **500+ coding problems** on CodeChef, demonstrating programming and problem-solving skills.
- Earned **1 Gold and 1 Silver badge** on CodeChef.
- Developed and deployed **4 practical projects** involving Java, Python, web development, and Generative AI.
